

DATA SHEET

Reusable sponge D22

Reusable sponge for MCScap-CS22 / MCScap-CS22SS electrodes.

REF	Quantity per package
003-0-367	10 pcs.
003-0-368	50 pcs.

SET

- Reusable sponge D22 – 10 / 50 pcs.

DESCRIPTION

Sponges for holding conductive solutions inside the electrode MCScap-CS22, MCScap-CS22SS. Made from porous, lint-free material that has the ability to retain moisture for a long time. Supplied in the form of pressed discs, which when wet increase in volume and become elastic. When dry, the disc does not decrease in volume, but restores its elasticity and water-retaining properties when wet again.

SPECIFICATION

Moisture capacity of one piece	1.8 ml
Diameter in pressed state	21.9 mm
Thickness in pressed state	2.0 mm
Weight of one piece	< 0.3 g
