

DATA SHEET

Reusable needle Inf

Blunt needle for adding gel with a diameter of 2 mm and a length of 3 mm.

REF

003-0-311

SET

– Reusable needle Inf.

DESCRIPTION

Reusable blunt needle for the introduction of an electrically conductive gel through a special hole in the thin MCScap® electrodes. Designed for use with a syringe. The needle is shortened to eliminate the possibility of damage to the skin of the head in newborns.
